Professional Summary

Senior full-stack developer with 15+ years across the full SDLC, shipping web-based enterprise applications from front-end UI through service back ends and relational databases.

Professional Experience

Abrams Software Toronto, Ontario (Remote)

August 2025 – Present

Full-Stack Developer · Independent

- Built CVForge, a blurb-library and CV-builder product with twin single-page front ends in Vue.js 3 and Angular 18 over an ASP.NET Core (C#) REST Web API with relational SQL persistence.
- Designed the REST API endpoints consumed by both SPA clients and by an MCP tool-server integration.
- Shipped other production web applications solo, including a multiplayer game (Node.js, PostgreSQL, with a REST API contract generated from JSON Schema) and a React 19 + TypeScript chess visualization consuming the Lichess REST API.

Employment and Social Development, Canada Gatineau, QC

December 2021 – July 2025

Senior Software Developer — Cloud-Native Microservices

- Enhanced and maintained a cloud-native microservices onboarding application (.NET Core / C#, Blazor, Azure SQL, Azure Functions).
- Designed and consumed REST APIs between services, documented with Swagger and governed through Azure API Management.
- Migrated downstream identity to Azure Managed Identities, eliminating the secret-rotation incident class.

Employment and Social Development, Canada Gatineau, QC

August 2019 – November 2021

Senior Software Developer — Internal Web Application & CI/CD Automation

- Co-architected and developed an internal C# / .NET web application — web UI for authoring structured automation scenarios, SQL Server relational schema design, and a co-designed REST API providing bidirectional integration with Azure DevOps pipelines.
- Engineered Azure DevOps pipelines that provisioned Windows agents to run parallelized automated runs against deployed applications; enforced coding standards through code review.
- Drove a tooling consolidation that cut software licensing costs while preserving capability.

Department of Immigration, Refugees, and Citizenship, Canada

Ottawa, ON

August 2017 – August 2019

Team Lead / Technical Lead — Platform & Tooling

- Technical leadership of a cross-functional team — led Agile / Scrum sprint planning, review, retrospective, daily stand-up, and backlog refinement; introduced poker-planning estimation and capacity forecasting; set engineering standards.
- Mentored developers in SQL Server query optimization — query tuning, indexing strategy, partitioned tables, and execution-plan analysis — and coached on C# / .NET.
- Administered departmental Azure DevOps Server / TFS instances, maintained heavily customized process templates, and managed user/group security across multiple project collections.

Department of Justice, Canada Ottawa, ON

December 2015 – August 2017

Acting Lead Developer — iCase / Microsoft Dynamics CRM Modernization

- Lead developer on the live Legal Case Management System (iCase) — a large n-tier ASP.NET / C# / ADO.NET enterprise web application used by 5,000+ government lawyers — while concurrently building its Microsoft Dynamics CRM successor.
- Engineered Dynamics CRM plug-ins, custom actions, and workflows in C# (rewriting legacy stored procedures as C# / LINQ); used SSIS for ETL; produced entity-relationship diagrams and multi-month effort-estimation breakdowns (FDD / TDD).
- Established code-review processes gated on work items and mentored junior developers.

Department of Citizenship and Immigration, Canada Ottawa, ON April 2014 – December 2015

Senior Software Engineer · Release Engineering Lead

- Installed, configured, customized, and upgraded the Azure DevOps Server / TFS platform across dev / UAT / production — complex multi-step upgrades, Kerberos / SPN configuration, and database-tier migration.
- Replaced over-engineered legacy C# desktop tooling with lightweight PowerShell calling REST APIs, bringing everything under source control.
- Implemented and deployed web extensions in React / TypeScript / Node.js, contributing upstream to Microsoft's vsts-team-calendar.

Department of Justice, Canada Ottawa, ON October 2008 – April 2014

Full-Stack Developer — Legal Case Management System (iCase)

- Core developer on a distributed, multi-tier ASP.NET / C# enterprise platform used by 5,000+ government lawyers nationally.
- Optimized a high-traffic backend report for a ~50x speedup via execution-plan analysis.
- Migrated core business modules from VB.NET to C#.

Education

Bachelor of Computer Science (Honours) - Carleton University September 1999 – May 2003

Technical Skills

Back-End (.NET): C#, ASP.NET (Web Forms → Core), ASP.NET Web API / REST, .NET Framework 2.0 – 4.8 and .NET 5 – 8, VB.NET (legacy migration to C#), Entity Framework, LINQ, ADO.NET, XML / XSLT, WCF / WPF, IIS, Visual Studio 2005 – 2022.

Databases: MS SQL Server 2005 → 2019, Azure SQL, PostgreSQL — relational modelling, T-SQL stored procedures, indexing, partitioning, execution-plan tuning.

APIs: RESTful Web API design between services — documented and tested with Swagger (OpenAPI) and Postman; published and governed through Azure API Management; SOAP / WCF on legacy tiers.

Front-End: JavaScript, TypeScript, HTML / CSS, React, Angular, Vue, Blazor, Knockout.js — responsive, WCAG AA / AODA accessible.

DevOps & Process: Azure DevOps Services and Azure DevOps Server / TFS (all supported versions — installation, upgrades, administration), Git, CI/CD pipelines · Agile / Scrum (Professional Scrum Master I) and waterfall delivery · code review, mentoring, JAD sessions, FDD / TDD documentation and effort estimation. Professional Scrum Master I (Scrum.org) · ITIL v3 Foundation (Loyalist Certification Services).
